

How to recover onchain wallet?

To recover an onchain wallet, (+1-864-310-5443) you will need either your seed phrase (recovery phrase) or private key, which were provided when you first created the wallet. Begin by downloading the same wallet application you originally used, such as MetaMask, Trust Wallet, or Phantom. (+1-864-310-5443) Instead of creating a new wallet, select the option labeled "Import Wallet," "Recover Wallet," or "Restore with Seed Phrase." Carefully enter your 12 or 24-word seed phrase in the exact order, ensuring each word is spelled correctly with no extra spaces. (+1-864-310-5443) Once submitted, your wallet will restore access to all associated addresses and balances. If you only have a private key, you can import it as a single account rather than restoring the full wallet. It is critical to never share your seed phrase or private key with anyone and to store them in a secure, offline location. (+1-864-310-5443) Without these credentials, wallet recovery is impossible, as onchain wallets are decentralized and non-custodial.
